SUBJECT INDEX TO VOLUME 50

2-Acetylpyridine thiosemicarbazone, 227
Albumin, human serum, haem undecapeptide and, 1
Alkaline phosphatase, salts and *E. coli*, 173
Aluminum transport, rat intestine and, 21
Aluminum(III), equilibrium/structural studies of, 119
Ammonium chloride, alkaline phosphatase and, 173
Anion binding site, thiocyanate interaction with lactoperoxidase and, 181
Anion complexes, lactoperoxidase, 157
Antitumor activity
  copper(II) complexes and, 31
  2,2′-dipyridylamine Pt(II)/Pd(II) complexes with amino acids and, 9
  ethylenediamine platinum(IV) complexes and, 79
Arthritis, rheumatoid, treatment for, 299
Asbestos, detoxified crocidolite and, 133, 145
Azide, Glu-133, superoxide dismutase, and, 89
Bezafibrate, ferrous human hemoglobin and, 263
Cadmium, toxicity of divalent, 235
Calcium, lactoperoxidase and, 157
Carboxylate ligands, complexes containing mixed, 79
Carcinogenesis
  copper(II) metabolism and, 31
  nickel(II) and, 211
Catecholamines, aqueous complexation between silicic acid and dopamine and L-DOPA, 119
Chloroplast thylakoid membranes, toxic metal ion interaction with light-harvesting proteins of, 235
Chromium complexes, uric acid in, 107
Chromium-uric acid complexes, uricase in *Neurospora crassa* and, 107
Cinoxacin, synthesis/characterization of, 65
Clofibric acid, ferrous human hemoglobin and, 263
Cobalamin coenzymes, catalyzation by, 47
Cobalt
  binding of divalent, 283
  ferric uptake regulation repressor protein binding to cobalt(II), 193
Copper(II), ferric uptake regulation repressor protein binding to, 193
Copper(II) complexes
  cytotoxic/cytostatic activity of, 31
  mixed-ligand, 65
  superoxide dismutase activity of, 273
Corrinoid-catalyzed thiol oxidation, inhibition to, 47
Crocidolite, detoxified, 133, 145
^{15}N Cyanide ion, gold(I) complexes and, 299
5,5-Dimethyl-1-pyrroline-N-oxide, free radicals in nickel(II)-thiol complexes with, 211
2,2′-Dipyridylamine palladium(II) and platinum(II) complexes, 9
Dopamine, silicic acid and, 119
E. coli alkaline phosphatase, salts and, 173
Electron spin resonance studies
  crocidolite, detoxified, and, 133, 145
  free radicals and nickel(II)-thiol complexes, 211
Electrostatic interactions
  E. coli alkaline phosphatase and, 173
  Glu-133, superoxide dismutase, and, 89
Equilibrium/structural studies, silicon(IV), aluminum(III), and, 193
Ethylenediamine platinum(IV) complexes, antitumor activity of, 79
Ferric uptake regulation protein, binding of, 193
Ferrozine, detoxified crocidolite and, 133
Fertility/infertility, 2-acetylpyridine thiosemicarbazone and, 227
Fourier Transform infrared difference spectroscopy, toxic metal ions and, 235
Free radicals, nickel(II)-thiol complexes and, 211
Fur complex, binding of, 193
Glu-133, superoxide dismutase and, 89
Glutamic acid residues, superoxide dismutase and, 89
Glutathione, oxidized, vanadyl(IV) cation interaction with, 253
Gold(I) complexes
  ^{15}N cyanide ion binding with, 299
  rheumatoid arthritis treatment and, 299
Gold(I)-thioglucose, ^{15}N cyanide ion interaction with, 299
Gold(I)-thiomalate, cyanide ion interaction with, 299
Haem undecapeptide, human serum albumin and, 1
Haem-peptide-protein interactions, 1
Hemoglobin, inositol hexakisphosphate, bezafibrate, clofibric acid, and ferrous human, 263
Hydrophobicity, ligand-protein complex and, 1
Inositol hexakisphosphate, ferrous human hemoglobin and, 263
Intestine, rat, aluminum and water transport across, 21
Iron
  crocidolite, detoxified, and, 133, 145
  ferric uptake regulation repressor protein binding to, 193
  thiocyanate interaction with lactoperoxidase and, 181
L-DOPA, silicic acid and, 119
Lactoperoxidase
  NMR spectroscopy for comparison of heme site in, 157
  thiocyanate and, 181
Lanthanum, photoelectron spectra of complexes of sodium and, 245
Lead, toxicity of divalent, 235
Ligand-protein complex, hydrophobicity and, 1
Lipid hydroperoxides, free radicals in nickel(II)-thiol complexes and, 211
Magnesium, binding of divalent, 283
Manganese(II), ferric uptake regulation repressor protein binding to, 193
Mercaptoethanol, methyl iodide and, 47
Mercury, toxicity of divalent, 235
Metal complexes, uric acid, 107
Metal ions
  binding of, 283
  Fur binding and, 193
  toxic, 235
Methyl iodide, mercaptoethanol and, 47
Mössbauer studies
  crocidolite, detoxified, and, 133, 145
  ferric uptake regulation protein binding, 193
Monophosphate nucleotides, VO^{2+} interaction with, 101
N-acetylalanine, sodium and lanthanum complexes and, 245
N-acetylvaline, sodium and lanthanum complexes and, 245
Nalidixic acid, synthesis/characterization of, 65
Neurospora crassa, chromium-uric acid complexes and, 107
Nickel, binding of divalent, 283
Nickel(II)-thiol complexes, free radicals and, 211
Nuclear magnetic resonance studies
  ^{15}N cyanide ion binding with gold(I) drugs, 299
  lactoperoxidase, 157
  thiocyanate and lactoperoxidase, 181

Oxolinic acid, synthesis/characterization of, 65
Palladium(II) complexes, antitumor, 9
Peptide, haem-peptide-protein interactions, 1
Phosphate, aluminum and water transport and, 21
Photolysis, 2-(-3-benzoylphenyl)propionic acid, 273
Platinum(II) complexes, antitumor, 9
Platinum(IV) complexes, ethylenediamine, 79
Poly(dG-dC) · Poly(dG-dC), metal ions binding to, 283
Protein
  ferric uptake regulation repressor, 193
  haem-peptide-protein interactions, 1
Quinolones, copper(II) mixed-ligand complexes with, 65
Rheumatoid arthritis, treatment for, 299
Salt, *E. coli* alkaline phosphatase and, 173
Silicic acid, aqueous complexation of catecholamines and, 119
Silicon(IV), equilibrium/structural studies of, 119
Smoking, rheumatoid arthritis treatment and, 299
Sodium
  alkaline phosphatase and, 173
  photoelectron spectra of complexes of lanthanum and, 245
Spectroscopic studies
  2-acetylpyridine thiosemicarbazone, 227
  crocidolite, detoxified, and, 133, 145
  ethylenediamine platinum(IV) complexes containing mixed carboxylate ligands, 79
  ferric uptake regulation repressor protein binding, 193
  ferrous human hemoglobin, 263
  Fourier Transform infrared difference, toxic metal ions, 235
  haem-peptide-protein interactions, 1
  inductively coupled plasma optical emission spectrophotometry, aluminum and water transport, 21
  magnetic resonance, 157, 181, 299
  metal ion binding to poly(dG-dC) · poly(dG-dC), 283
  palladium(II) and platinum(II) complexes, 9
  vanadyl(IV) cation interaction with oxidized glutathione, 253
  VO^{2+} interaction, 101
  x-ray photoelectron, sodium and lanthanum complexes, 245
Superoxide dismutase
  copper(II) complexes and, 273
  Glu-133 and, 89
Thiocyanate, lactoperoxidase and, 181
Thiosemicarbazones, titanocene and zirconocene complexes and, 227
Thymidine monophosphate, spectrophotometric study of, 101
Titanocene, synthesis/characterization of, 227
Tris, alkaline phosphatase and, 173
Uric acid, chromium-uric acid complexes, 107
Vanadyl(IV) cation, oxidized glutathione interaction with, 253
VO^{2+} interaction, spectrophotometric study of, 101
Water transport, rat intestine and, 21
Xanthine-xanthine oxidase, superoxide dismutase of copper(II) complexes and, 273
Zirconocene, synthesis/characterization of, 227
